Further, pressure to reduce HR costs made it harder to identify and attract the most talented people. Everything suggests that the war for talent will rage on. "Failure to attract and retain top talent" was the number-one issue in the Conference Board's 2016 survey of global CEOs—before economic growth and competitive intensity (Exhibit 2).

Attracting and retaining the right talent | McKinsey

Update, October 2019: The National Center for Education Statistics (NCES) has announced that weights developed for the teacher data in the 2015-2016 National Teacher and Principal Survey (NTPS) were improperly inflated and that new weights will be released (release date to be determined). According to the NCES, counts produced using the original weights would be overestimates.

The teacher shortage is real and has serious consequences

A survey of more than 3,000 C-suite executives in seven countries—Canada, France, Germany, Italy, Spain, the United Kingdom, and the United States—that we conducted as part of our research confirms our quantitative findings. Advanced IT and programming skills are viewed as the most important skills needed in the next three years.

Automation and the workforce of the future | McKinsey

According to a BCG survey (2016), the toughest challenges US enterprises face starting IoT-enabled digital transformation initiatives include uncertainty about the ROI, data security and privacy issues, the lack of qualified employees, and the integration with the legacy systems. Other significant concerns include the inability to do fast ...
