three dimensions (also called pillars): the environmental, economic and social dimension. This concept can be used to guide decisions at the global, national and at the individual consumer level. A related concept is that of sustainable development. Both terms are often used synonymously. UNESCO formulated a distinction as follows: "Sustainability is often ...

## **Sustainability - Wikipedia**

The economic growth of a country is the increase in the market value of the goods and services produced by an economy over time.. We define economic growth in an economy by an outward shift in its Production Possibility Curve (PPC). Economic growth is measured by the increase in a country's total output or real Gross Domestic Product (GDP) or Gross National Product (GNP).
