How many Candies - Printabell • Create

An approximate method to calculate the number of sweets in a jar, is to multiply the number along the width and length of the base by the number of sweets in the height of the jar. Granular Matter theory then tells us that on average a jar of mixed shapes will have about a 30% air gap in between the sweets.

Counting Sweets in a Jar - IMA

Simply fill a large jar or other see-through container with a collection of appealing sweets. Ask the children to guess the number of sweets and write their guess down, with their name. When everyone has guessed, tip out the sweets and count them. The child who guessed closest wins the lot.

How Many Sweets In The Jar? - Activity Village

A large jar is filled with a carefully counted number of sweets. People then try to guess how many sweets are in the jar. Guesses are recorded on a sheet of paper numbered off so that no-one chooses the same number as a previous guess. At the end of the event the nearest guesser wins either the jar itself or another prize.

How many sweets in the jar? | 101 Computing

01274 685 566. Guess the number of sweets. Jim Burns of Jakemans has very kindly supplied some sweets (very nice by the way!) for our Halloween Competition. Dave our Sales Director is growing a moustache for Movember and raising funds for toys for the Children's Cancer Ward at LGI.

Guess the number of sweets | National Flexible

The volume of the cylinder container is worked out by multiplying the area of the end of the cylinder (πr^2) by the height, which comes to 15708 cm³. The volume of the spherical sweets are worked out using $V = \frac{4}{3}\pi r^3$ which comes to 33cm³. The number of sweets in the jar is therefore equal to $(15708/33)*0.74 = 352$ sweets!
