IHC engines. The first IHC "Highwheeler" truck had a very simple air-cooled horizontally opposed two-cylinder engine with a 5-inch (130 mm) stroke and a 5-inch (130 mm) bore, and produced around 18–20 hp (13–15 kW). Displacement was 196 cubic inches (3.2 L). In 1915 a new L-head water-cooled 201 cubic inches (3.3 L) inline-four engine appeared.

SO, found a Bosch VA6 BR pump off of a D358 that I believe was in a IH 826 from the guy I mentioned earlier. I've got the pump on, had to bend the lines to go on at an angle and the tractor will idle pretty decent. But as soon as I start giving it throttle it goes to pot. Would the old D358 have a different timing advance?
