(MRI) scanners play an important role in the diagnosis of diseases and management of patient treatment. Quality assurance (QA) of the clinical MRI scanners is mandatory to obtain optimal images in a modern hospital. In this report, the phantom test for the American College of Radiology (ACR) MRI accreditation is used as the essential part of the MRI QA.

In 2001, the ACR published the MRI Quality Control Manual. This manual describes the impact of ongoing QC and emphasizes the need for a coordinated team approach on the part of radiologists, technologists, and medical physicists or magnetic resonance scientists in optimizing quality imaging through QC.
