Notes Of A Radiology Watcher

Notes of a Radiology Watcher aims to show the reader how radiology is being transformed from its customary focus of the last 40 years to meet the disparate challenges of competing influences and an uncertain future. Considerations on the elaboration of 'milestones' for residency education are examined, as well as the social and economic issues that are codified into focused initiatives that must be addressed by each

springer, The Radiology Department is a pivotal part of any acute and/or comprehensive health care facility. The radiologist can no longer just "hide out" there. Matters of imaging are often public concerns, larger in scope than just the scheduling and managing of a series of image tests. Rather radiology is expensive, often intrusive and in some areas earnestly and endlessly controversial.

Bochdalek's flower basket is the eponymous name for the incidental finding of protrusion of the choroid plexus through the foramina of Luschka. This is a relatively common finding. It is an important normal variant to recognize as the presence of protruding calcified choroid tissue in the fourth ventricle can be confused with subarachnoid hemorrhage 2 or a CP angle mass.
