The scientific study of classification is known as taxonomy. A biologist studying taxonomy is a taxonomist. In classifying organisms taxonomists to a great extent rely on the use of external observable features of organisms.

Classification 1 - Form 1 Biology Notes

The order of classification is: Kingdom Phylum Class Order Family Genus Species Taxa: groups of organisms which share characteristics Binomial Nomenclature: named with two names (genus/species) can use genus by itself, but never species alone. First used by Linnaeus, who came up with classification and the first to use binomial nomenclature.
