With your Fios router already installed, follow the below steps to activate your VMS or STB. Reference the user guide while going through the activation steps. With your Fios router already installed, follow the below steps to activate your Video Media Service (VMS) or Set-top Box (STB). Make the connections:

Activate Set-top Box or DVR | Verizon TV Support

That will do it. #5 Do not set a Default Gateway or edit the DNS Settings on your computer. #6 You can now talk to 192.168.1.1 ** Option #2 *** #1 Your computer must have two NICs, one of the NICs must be a wired NIC., you must know how to setup a manual Static IP on your computer (see option one above, I have a link to a place that provides directions), and both routers can not be in the same ...

Just got a G3100 and a new setup. How do I ... - Verizon

Sorry for the long post. Users who connect the RJ-45 WAN port of their own (separate) NAT router who put their modem into bridge mode (not configured to handle a WAN IP), typically can not by default get access anymore to their modem's UI. One of the best reasons for DSL users for getting access...
